Material Data Center Latest Version: 1.0  The development of sustainable, efficient, minimum weight designs requires accurate multi domain material properties. Altair Material...	HyperWorks Latest Version: 2021  From concept design to detailed product development, Altair HyperWorks drives more design with simulation for the product...	HyperMesh Latest Version: 2021  High-performance finite element pre-processor to prepare largest models, starting from import of CAD geometry to exporting an...	OptiStruct Latest Version: 2021  Industry proven, modern structural analysis solver for linear and non-linear structural problems under static and dynamic loadings. The...	SimLab Latest Version: 2021  Process-oriented multidisciplinary simulation environment to accurately analyze the performance of complex assemblies.
SimSolid Latest Version: 2020.2  Eliminates geometry simplification and meshing, the two most time-consuming and expertise-intensive tasks done in traditional FEA...	SimSolid Basic Latest Version: 2020.2  SimSolid Basic provides all modeling functions but is limited to linear statics and modal analysis only.	HyperLife Latest Version: 2021  An easy-to-learn software developed on a solver-neutral framework that provides a comprehensive tool kit for fatigue...	Inspire PolyFoam Latest Version: 2021  Simulate polyurethane molding and foaming processes early to improve product quality and cycle time and reduce scrap and tooling rework...	Inspire Mold Latest Version: 2021  Inspire Mold is a complete molding simulation in 5 easy steps through a highly intuitive user experience, catering to beginners and experts...
Feko Latest Version: 2021.0.1	Compose Personal Edit... Latest Version: 2021	Activate Personal Editi... Latest Version: 2021	Inspire Form Latest Version: 2021	MotionSolve Latest Version: 2021

Dear seunghun,

Altair is pleased to announce that the Connect and solidThinking portals are being migrated to Altair One, and will now be accessed through the Altair One single sign-on experience.

As an account holder, you must use the link below to activate your account in order to access functionality previously available through Connect and solidThinking.

In addition to the same functionality you expect from the Connect and solidThinking portals, you will have access to many other resources through Altair One, including:

- A vast software marketplace featuring tools from Altair and beyond
- Support resources
- Account information including user details, hosted Altair Units and more
- Your software downloads

클릭

Activate Altair Account

This link expires in 30 days.

가입 시 기재하신 메일주소로 <Altair One> no-reply@altairone.com에서 발송된 **'Activate Your Altair One Account'** 이라는 제목의 메일을 확인하시어 반드시 **'크롬'** 브라우저로 활성화하여 주십시오.

만약 Activation 메일이 수신되지 않았을 경우 support@altair.co.kr 로 문의 주시기 바랍니다.

Software Suites

Simulation Products

Altair's simulation-driven approach optimizes design performance across multiple disciplines encompassing structures, motion, fluids, thermal management, electromagnetics, system modeling and embedded systems, while also providing data analytics and true-to-life visualization and rendering. As a leading provider of enterprise-wide engineering software.

[See Products](#) [Documentation](#)

HPC Products

Whether onsite or in the cloud, Altair's HPC solution accelerates your engineering and design workload especially compute-intensive tasks like solvers, optimization, modeling, visualization, and analytics. Applications include workload management, HPC usability and remote visualization, license management, cloud bursting, and more.

[See Products](#) [Documentation](#)

Data Analytics Products

With the help of AI and machine learning, Altair turns difficult data into smart data, leading to actionable insights that help you solve your toughest challenges. Applications include data transformation, predictive analytics and machine learning, and more.

[See Products](#)

Altair Partner Alliance

The Altair Partner Alliance (APA) gives users access to a broad spectrum of complementary software products using your existing HyperWorks Units (HWUs) at no additional cost. Users can download and use partner applications on-demand, just as they do with HyperWorks products. This constantly growing portfolio extends your analysis capabilities to help you create.

[See Products](#) [Documentation](#)

Packaged Solution Offerings (PSO)

PSOs are offerings of commercial, tailorable user profiles for standardizing and automating CAE process workflows and are customized to meet our client's specific requirements. The diverse solution offerings include: Automated Reporting Director, Geomechanics Director, Impact Simulation Director, Model Mesh Director, Model Verification Director, Simulate &.
